Disclaimer

Compatibility tests are conducted by ALED only as guidance for the user. All tests are conducted under bench conditions; results may differ from test results depending on conditions at the application site.

Results may vary due to variability in component choices and manufacturing processes by the transformer and dimmer manufacturers.

This list only includes dimmers that have been tested with the ALED GU10 lamps. There may be other dimmers on the market that are compatible with these retrofit lamps or luminaires. If you have a question about a particular dimmer that is not on the list, please contact us to see if the model has been tested, or to arrange testing.
